

**WHITEPAPER**

# ArtFormNFT

ArtFormNFT is a Crowd funded NFT Marketplace Launchpad providing infrastructure for BSC NFT protocols to launch in a secured and fast way. Value created in the Launchpad (partnerships and sales) are sent back to Holders via buybacks and burns of **\$ARFT** token. Deflationary tokenomics with BNB reflection feature.

# Business Case

The business case is built on analysis of the opportunities in the current NFT market.

## The opportunity

The current NFT marketplace focus on a B2C model, marketplaces create the medium where the artists are able to mint and sell their art in an economically beneficial way.

Analyzing the market need, we identified the B2B area where many protocols need a platform they can afford to list the art created that serves the use case for their tokens. The opportunity for us was clear, creating a B2B NFT marketplace where the other protocols can afford to launch in a quick and secured way.

## The product

We are building **ArtFormNFT** as an NFT Marketplace Launchpad, serving thousands of protocols currently trying to create an NFT economic value for their tokens. Enabling protocols and artists to create digital collectables (in the form of non-fungible tokens, NFTs) using BNB operating on Binance Smart Chain Network via the main platform.

## The business model

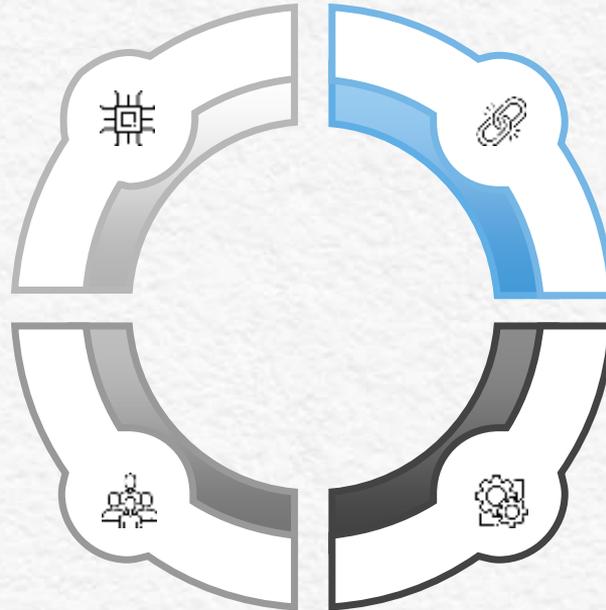

Platform as a service for different protocols renting space on our marketplace with affordable prices, also, we will offer vetting and background checks on the value of the protocols.

# Our Mission

Our Mission Is To Empower small investors to own a part of a dynamic and growing NFT Marketplace Launchpad.

A Launchpad serving other protocols to create NFT utility for their tokens and serving our investors to maximize ROI on their \$ARFT.

## Digital currency

Token utility via volatility value capture and BNB distribution

## Multi - chain

Starting on BSC to on-board users, extension to SOL/Polygon/Eth

## User/Partner On boarding

The most user-friendly onboarding system on BSC to NFT marketplace for buyers and sellers

## Never ending development

Development team working on an entire ecosystem around the protocol

# Key features

THESE ARE THE 3 key features to create the back-bone of ArtFormNFT Ecosystem:

## Tokenomics

- Deflation built-in:  
Benchmarked best tokens launched and supply adjusted to best short and long-term price increase
- 10% of each transaction are redistributed to every \$ARFT holder every 60 minutes as BNB
- 5% of each transaction added to liquidity increasing price floor and creating better liquidity optimized slippage

## Distribution

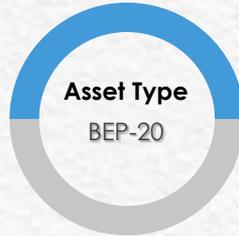

- Presale design to allow the best distribution among holders with max allocation
- Anti-Whale: Max sell level built in the presale contract protecting the price from sharp fall
- Launch on pancakeswap with high liquidity to protect from slippage

## NFT Marketplace Launchpad

- NFT marketplace Launchpad serving sellers and partners
- A voting system to adjust the roadmap as community extends ownership of the protocol

# What is ArtFormNFT?

A fair distribution rug proof reflect token on the BSC Chain, with value extraction from NFT Marketplace Launchpad

## Economic Utility

**ArtFormNFT** auto yields rewards just for holding it. Every transaction incurs a 15% fee "Reflection" (10%-holders, 5% Locked liquidity). The 10% tax are used to buy BNB and distribute it to ArtFormNFT holders every 60 minutes. Hold and earn while others buy and sell to automatically get your rewards.

### 10% Holders

Auto farming without need to interact with contract; in BNB

### 5% LP

Price floor going up

## Ecosystem Utility

**ArtFormNFT** will offer the ability to extract value from a large NFT marketplace. Currently no open B2B NFT marketplace exists on BSC and very few closed proprietary markets with great communities behind it. You are getting part of the Launchpad fees and every NFT sale. Every partnership or NFT sale burns **ArtFormNFT**.

### % Sale

Every NFT sale will get a % of BNB to buyback and burn **ArtFormNFT**

### % Partnership

Every Partner using the Launchpad will pay a fee. % of it will be used to buyback and burn **ArtFormNFT**

# Token utility

## Economic utility

ArtFormNFT will offer the ability to extract value from a large NFT marketplace. Currently no open B2B NFT marketplace exists on BSC and there are very few closed proprietary markets with great communities behind it. You are getting a part of the Launchpad fees and % of NFT sales.

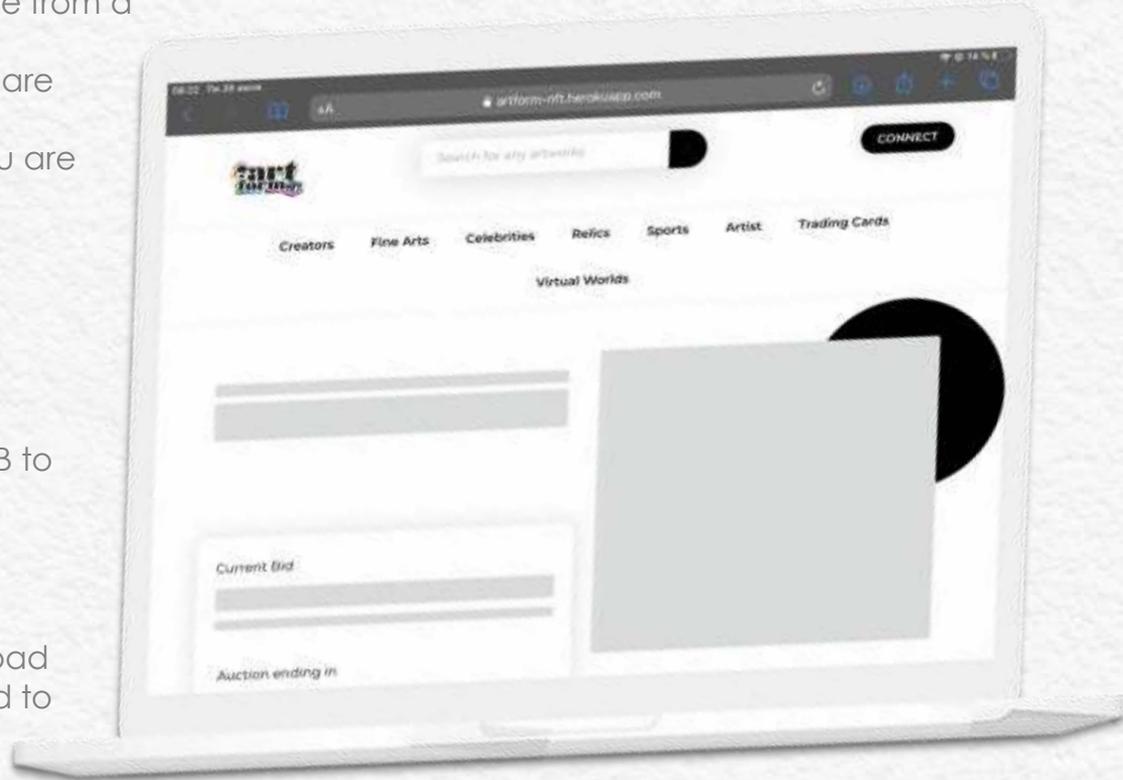

**10% Sales**

Every NFT sale will get a % of BNB to buyback and burn \$ARFT

**5% Partnership**

Every Partner using the Launchpad will pay a fee. % of it will be used to buyback and burn \$ARFT

# Tokenomics Quadfecta

## Multiple Passive Income Stream

### Quadfecta:

We are designing the new tokenomics prioritizing the token holders, every part of the infrastructure will give more utility to **ArtFormNFT**

#### **BNB**

Volume of transactions will be taxed and redistributed to Holders

#### **Partnership**

Part of the paid partnership will be distributed to holders

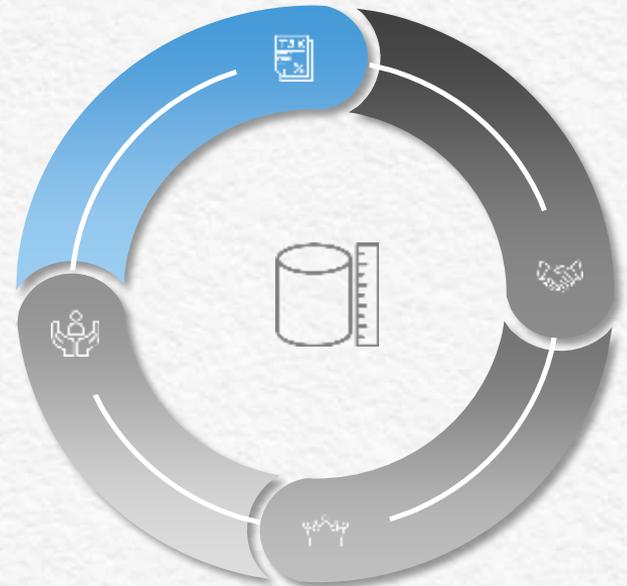

#### **Royalties**

% of every NFT sale will be distributed to holders

#### **Value creation**

The utility will bring value to the protocol as a whole and then price increase for **\$ARFT**

# Monetizing process

We designed a monetization process with \$ARFT token as the main beneficiary.
